

# 22 APRIL MEETING

## 1. Task Delegation for Upcoming Sprint

- **Sesihle will work on implementing user authentication. He plans to create a secure login system and has started researching token-based authentication.**
  - **Khusello has finalized the test data structure and will now focus on integrating the API endpoints with the backend logic.**
  - **Wakhiwe presented the revised wireframes for the dashboard. He discussed frontend responsibilities with Salimata:**
    - **Wakhiwe will design the Notifications Page.**
    - **Salimata will redesign the User Profile Page for improved UX.**
  - **Simango is awaiting updated API endpoints from Khusello. In the meantime, he's optimizing the performance of the existing JavaScript functions and replacing hard-coded values with dynamic variables.**
  - **Salimata completed a draft of the new homepage and led a feedback session. She also began preparing UI testing scripts for the Freelancer Job Page.**
- 

## 2. Database Design Clarifications

- **Sesihle asked about encryption for sensitive user data in the database.**
  - **Thoriso explained that client and freelancer profile data should be encrypted using industry standards like bcrypt and AES.**
  - **Khusello suggested revisiting the sign-up schema to support optional username fields for future personalization features. The team agreed to include the field as optional.**
- 

## 3. GitHub Collaboration

- **As Scrum Master, Salimata reiterated the importance of maintaining active collaboration on GitHub. All team members should:**
    - **Pull, Push, and Commit regularly.**
    - **Open merge requests for peer review before merging to main.**
-

# **22 APRIL MEETING**

**Meeting adjourned.**
