

Scrum Meeting Minutes

Date: 18 April 2025

Facilitator: Khuselo

Team: Khuselo, Sesihle, Wakhiwe, Salimata, Simango, Mareme

Discussion Points

1. Product Backlogs

- We must finalize user stories **before** any coding begins.
- **User stories** will guide development flow and ensure alignment with user needs.

2. Version Control

- All developers must **pull and commit using separate branches**.
- **Sali** will manage and maintain the **main branch**.

3. Test-Driven Development (TDD)

- We aim for at least **50% code coverage** using TDD.
- If 50% coverage is not achieved, an **explanation is required**.

4. UML Diagrams

- A total of **5 UML diagrams** are required for submission.

5. Frontend Work

- The **website needs polishing** – visual and UX enhancements.

6. Bonus Marks

- A functional **payment page** must be included for extra credit.

7. Design Assets

- **Wireframes and mockups** must be created and included in the final submission.
-

Task Delegation

| Team Member | Task |
|--------------------|--|
| Thoriso | Complete all 5 UML diagrams by tomorrow and research payment integration |
| Sesihle | Investigate and apply Test-Driven Development (TDD) |
| Khuselo | Draft all user stories and collaborate on the database design |
| Simango | Collaborate on the database and develop the client page |
| Wakhiwe | Develop and polish the client page |
| Sali | Refine the existing website pages and maintain the main Git branch |
