

# MEETING MINUTES:14 April 2025

- **Sally**-Opened the meeting
  - we need to plan properly
  - Everyone needs to push into our repository
- **Wakhiwe**-we were able to complete more of requirements
  - we all need to learn Jest
  - start looking into project management and payments
- **Sesihle** – It would be easy to work with
  - Work on Jest
  - Take accountability
  - do things earlier
  - Let us look onto the next Sprint
- **Khusello**-Started the MongoDB very late
  - need to learn on how payments work
  - Join backend and integrate well with them
- **Doyern**-Very Proud for following delegations
  - Need to work on pushing using Git
  - Quality of the pictures should be attended to
  - we need to test critical and basic stuff(functionality)
  - The front-end people (CSS + html) need to put comments on code, and they should not name files with the same name
- **THORISO**-Look at MongoDB to store unique id from authenticator parties (google and Microsoft)
  - Start to look at payment's implementations
  - If testing was known earlier then we could have started earlier
