📄 Scrum Meeting Minutes
Date: 16 May 2025
Attendees : Khuselo, Salimata, Mareme, Doyen, Wakhiwe, Sesihle
Facilitator : Khuselo
Platform: Google Meet

🔍 1. Progress Updates

- Sesihle:

    - Focused on improving code coverage.

    - Increased test coverage from 49% to 64.5% after it dropped due to recent code changes.

- Mareme:

    - Worked on implementing payment logic.

    - Faced challenges due to unfamiliarity with the Firebase database structure.

- Doyen:

    - Collaborated with Wakhiwe on QuickStats functions for both clients and freelancers.

    - Assisted Sali in refining the frontend code.

- Sali:

    - Apologized for switching at last minute the meeting platform from video call to Google Meet.

    - Worked alongside Doyen to clean up code and remove unnecessary divs.

    - Created settings pages for both freelancer and client dashboards.

- Wakhiwe:

    - Built the QuickStats pages for both clients and freelancers.

    - Plans to begin work on the "Ongoing Projects" feature next.

- Khuselo:

    - Supported Mareme with integrating milestone status updates (done/in-progress) in the database.

- o Ensured proper communication between freelancer status updates and client visibility.

🗣 2. Discussions & Key Points

- Backend Workload:
  - o Recognized that there is substantial work pending on the backend.
  - o Sesihle volunteered to shift focus from code coverage to backend development.
- Task Time Estimation:
  - o Reminder issued to estimate task durations for better planning and transparency.
  - o Helps ensure all members are aware of expected completion times.
- Primary Goal:
  - o Main objective is to implement the payment feature successfully.
  - o Additional bonus feature: implement job search AI (optional).
- Post-Signup Flow:
  - o Need modifications after user signup to support the upcoming job search AI feature.
- Code Coverage:
  - o Acknowledged that test coverage will temporarily decline during active development.
  - o Sesihle will maintain a balance between contributing to backend and sustaining coverage.
- Database Clarity:
  - o Khuselo and Mareme to have a follow-up session to clarify Firebase database structure.
- Task Delegation:
  - o Emphasis on proper task delegation and time estimation to improve team efficiency and delivery. Tasks and their statuses are in notion.
